

Medicine River WILDLIFE CENTRE

WILD ANIMAL SPONSORSHIP PROGRAM

When you sponsor a wild animal at the Medicine River Wildlife Centre, you will receive the following:

- a color photo of the individual animal
- information about the species you have adopted
- patient information about the individual animal
- a certificate naming you as the sponsor of the animal

By sponsoring a wild animal at the Medicine River Wildlife Centre you have the opportunity to support that animal's return to the wild or assist with the care and housing of a permanent animal. Your sponsorship will help with day-to-day expenses, such as feed and medical care.

Sponsorship categories are listed below. A few sample species are listed within each category. You may choose the category and you will be designated a species that is currently available. Alternatively, you may circle a specific species. However, if that species is not available, you will be designated another species within that category.
