

FOLLOW UP ONSITE EDUCATION PROGRAM SYNOPSIS

Preschool - Grade 2 (3-7 years)

The onsite experience begins with an opportunity for a snack, bathroom break, and some much-needed movement in our Wildlife Homes Playground, lasting 20 minutes.

Let's get started! We will head out on our sensory trail walk, taking in the sights, sounds, smells, and even tangible parts of nature. We will stop at a variety of interesting locations and promote discussion and connection, lasting 20 minutes.

Once we reach the Learning Lodge we will head inside for the sit-down portion of the visit. As you have seen the formal program prior to this visit, we will simply highlight what you have learned and give you some reminders. Finally, you will have another opportunity to meet one of our education ambassadors! This may be a different animal from your previous visit, or perhaps the same (owl or skunk, see page 2). We remind about the specifics of that species and welcome questions from the audience. This lasts about 20 minutes.

Time to get up and move! We'll continue on our trail walk for the next 20 minutes, taking in the views from the tower overlooking the wetland. After a few stops along the way, we'll arrive back at the main building.

Playtime! Let's have some more fun on the playground before lunch.

Who's hungry? Let's have lunch in the picnic area before your departure.

The entire experience will last about 2 hours including snacks, lunch, and playtime. A common schedule for groups coming from the Red Deer area is as follows:

10:00am	Arrival
10:00-10:20	Snack, Bathroom, Playground
10:20-10:40	Outbound Trail Walk
10:40-11:00	Learning Lodge Presentation
11:00-11:20	Inbound Trail Walk
11:20-11:40	Playground, Bathroom
11:40-12:00	Lunch
12:00pm	Departure

Education Animals: You may ask for a particular animal but please be aware that we may not be able to fulfill that request. If the animal is booked elsewhere, does not work with the handler, or simply needs a break, we will bring a different animal. We will reserve an animal when you book your program but it may be changed prior to the date.

Otis the Great Horned Owl has been a part of the education team since 2003. He has no physical injuries but is human-imprinted and cannot be released into the wild. He loves to hoot and flap for his audiences.

Fang the Striped Skunk was admitted into our hospital in 2017. He was a runt and had infections in both eyes. After he regained his sight it was decided that he would help us to educate the public about his often misunderstood species.

Olive the Great Horned Owl joined the education team in 2019 as a youngster. She is socialized and comfortable with people and cannot be released. Being a female, she is bigger than Otis and has a spicy personality.
